

Introduction

ratpac-two summer school tutorials

Introductions

Garrett Wendel (Penn State) [Eos, LiquidO]

James Shen (UPenn) [Eos, SNO+]

Marc Bergevin (LLNL) [BUTTON, Eos]

Tanner Kaptanoglu (UC Berkeley) [Eos, SNO+]

Tony Zummo (Rutgers) [Eos, THEIA]

Sam Naugle (UPenn) [Eos, SNO+]

Flow for the summer school

- “Lectures” in the morning (9 am to noon)
- Workshops in the afternoon (1 pm to 4 pm)
- Questions highly encouraged during both times.
- We will share the workshop exercises after the lectures
- The workshop time is your own! For example, you can feel free to work on other ratpac-two related material that are outside the scope of the lectures for that day. We are here to help with questions.

Important links

- ratpac-two documentation is here: <https://ratpac.readthedocs.io/en/latest/> and is linked from the github page: <https://github.com/rat-pac/ratpac-two>
- Slides posted here nightly:
https://drive.google.com/drive/folders/1-BG3uAtxNNDPq2Vb71y0_zoMyJV6MQHo?usp=drive_link
- We will try and post recordings of talks to the above google drive every night.
- Plan to post these publicly after the summer school is finished.
- Slack channel:

Other notes

Particularly if you have no C++ experience, some slides may be difficult to follow, so **PLEASE ASK!**

Use the workshop time to ask questions too, post them to slack, or DM them to any of us, we are here to help!
